Project Summary (Please be specific about every detail):

Contract obligations under DOE Grant #G0900090 were to convert approximately 4,000 feet of open lateral ditch line to a closed pipeline conveyance system. Completed lateral ditch piping length is approximately 4150 feet. The West End Irrigation District had been in the process of converting their entire system to a closed gravity fed system for a number of years. The completed mainline piping efforts encompass approximately 4680 feet. Total project converting open ditches to a piped system is approximately 8830 feet. Due to WEID fiscal limitations they took a phased approach and over the years received funding support from Columbia County funds, Walla Walla Watershed Alliance and NRCS funds, Walla Walla Watershed Planning Phase 4 funds and the existing DOE grant to complete their project. This project was also substantially impacted by the consolidation project sponsored by WDFW which combined the diversion points of WDFW (acclimation pond), Hearn Irrigation Ditch and WEID into a single diversion point. Construction completion of this final phase has been delayed due to late change by Port of Columbia and Watco requiring the last lateral pipeline to be bored under the railroad track instead of open cutting. CCD acting on behalf of WEID has secured an additional grant thru the National Fish and Wildlife Federation/Community Salmon Fund to complete this project as the late requirement added cost to the project that was not in the existing budget. Approved contract was received by CCD in March 2011. CCD provided technical assistance for project assessment and design beginning in 2002. In 2004 WEID received limited funding thru the Columbia County Commissioners to start the project, 2004 WEID received funding thru Walla Walla Watershed Alliance and CCD provided funding to complete a Cultural Resource review. In 2008 CCD secured grant funding for this project thru the Walla Walla Watershed Planning Unit as part of Phase 4 Planning Unit project implementation and a grant thru Ecology in 2008 for project implementation funding.

from conveyance losses have returned to the river.

6. Remarks and Other Relevant Information:

This trust application is to complete a contractual obligation to place water saved through a ditch
canal lining project into Trust. The total quantities of water to be placed into trust under
Touchet River Adj. Cert. Nos. 99, 135 and 216 are not to exceed 1.22 cubic feet per
second, 221 acre-feet per year, during the months of April, May and June only.
This application also requests a change in POW as part of the irr. eff. Project (div. consolidation)

Certain applications may incur a Real Estate Excise Tax liability for the seller of the water rights. The Department of Revenue has requested notification of potential taxable water right related actions and therefore may be provided with a copy of this request.

Please contact the State Department of Revenue for further information. The phone number is (360) 570-3265. The address is: Department of Revenue, Real Estate Excise Tax, PO Box 47477, Olympia, WA 98504-7477.
